

- 65 attendees
- 8 speakers,
- 12 vendor companies

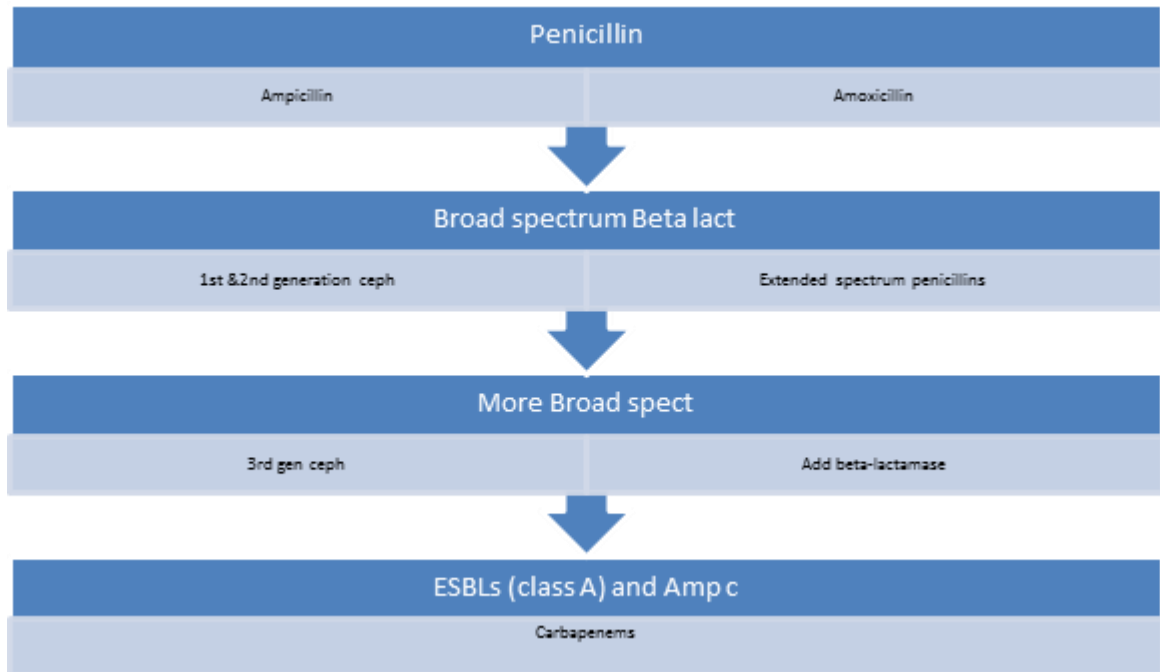

November 13, 2014- Oshawa

Notes

Allison McGeer- emerging/re-emerging Disease

- She surveyed the crowd and asked what they wanted to hear. Gave an option of 3 topics
- Group had most interest in ESBL... MRSA is not a significant LTC concern
- Evolution of Antibiotics- My chart isn't as good as what she showed...

- ESBL is a significant Ontario problem
 - Klebsiella ESBL- HAI
 - E.coli ESBL- CAI
- 86% resistant to Cipro
- No good drug to treat E.coli ESBL
- She talked about ABX use in asymp bacteriurea
- CPE is on the rise
 - Seen increase in endoscopy and Rehab. Not sure why
- Best bang for your \$:

- HH programs
 - ABHR for personal staff (e.g., pocket) as well as wall dispensers
 - Intervention
 - Performance feedback
 - Posters
 - Trainers
 - *Patient and residents cleaning their own hands!
- Discussed stopping mid stream urine cultures if in hosp >48hrs OR having the results not sent back to the unit... they would have to call if they really wanted to know.
- She is stopping urine cultures on the surgical floors. She would like to extend this to the medical floors.
- Q&A: LTC rep felt that if they practice ASP, but then resident health declines, goes to acute care facility, then receives ABX for ?UTI. Needs to be a partnership with ASP between LTC and acute

MRSA:

- 5 yrs ago, felt it was a losing battle... looked like all S.A were going to be MRSA. But, the data shows its stabilizing
- ?Dont know why
 - Maybe improved HH programs
 - Cleaning protocols
 - CHG bathing
 - Single rooms
- Also CAI is not increasing

Helen Christou - How to survive and control multiple outbreaks at the same time

- Multiple outbreaks at same time. Relationship between staff and ICP, relationship between ICP and PH
- What to do, when to call it off,

Kelly Holmes and Lindsay Parton

- Outbreak definitions

Keith Sopha- Improving the quality of clean through certification

- Developed, in conjunction with multiple commercial partners, a certification program for cleaning.
- Called Clean learning

Heather Candon- Utilizing IPAC resources

- PHO resources
- WOW!!!! Lots of great resources. Too many to list
 - Appendix N: clinical symp and level of precautions
 - Urine culture- when to send

Dan Ricciuto – Antimicrobial stewardship; UTI treatment and ABX use

Jim Gauthier – Granny as the susceptible host- Prevention tips for Care providers

- Personal approach to patient care. He told story of his own family member and their care plan.

Meet the Vendors

The Captive Audience

Thank you from the Planning Committee
